

UID EXPERIMENT-6

Name:Shanmuganathan S

Reg no.: 230701307

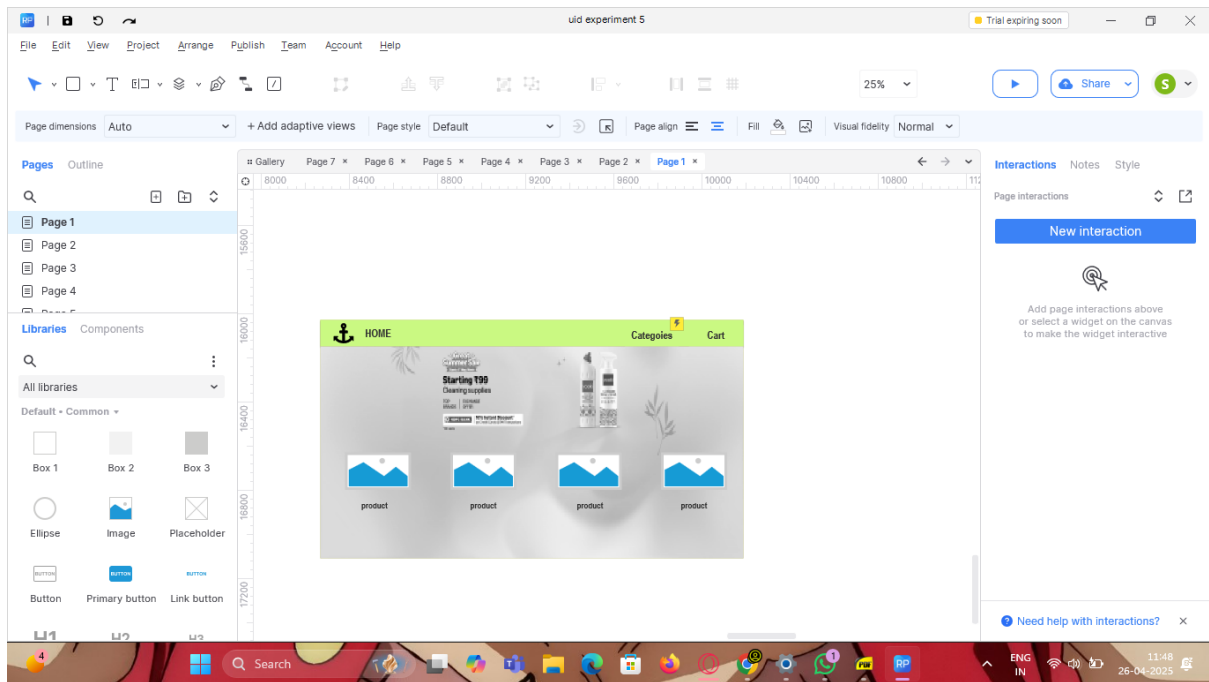

Step 1: Set Up the Tool

- **Tool Used:** Axure RP (instead of GIMP as mentioned in the PDF).
- Open Axure RP and create a new project.
- Define the screen dimensions (standard mobile size or custom as needed).

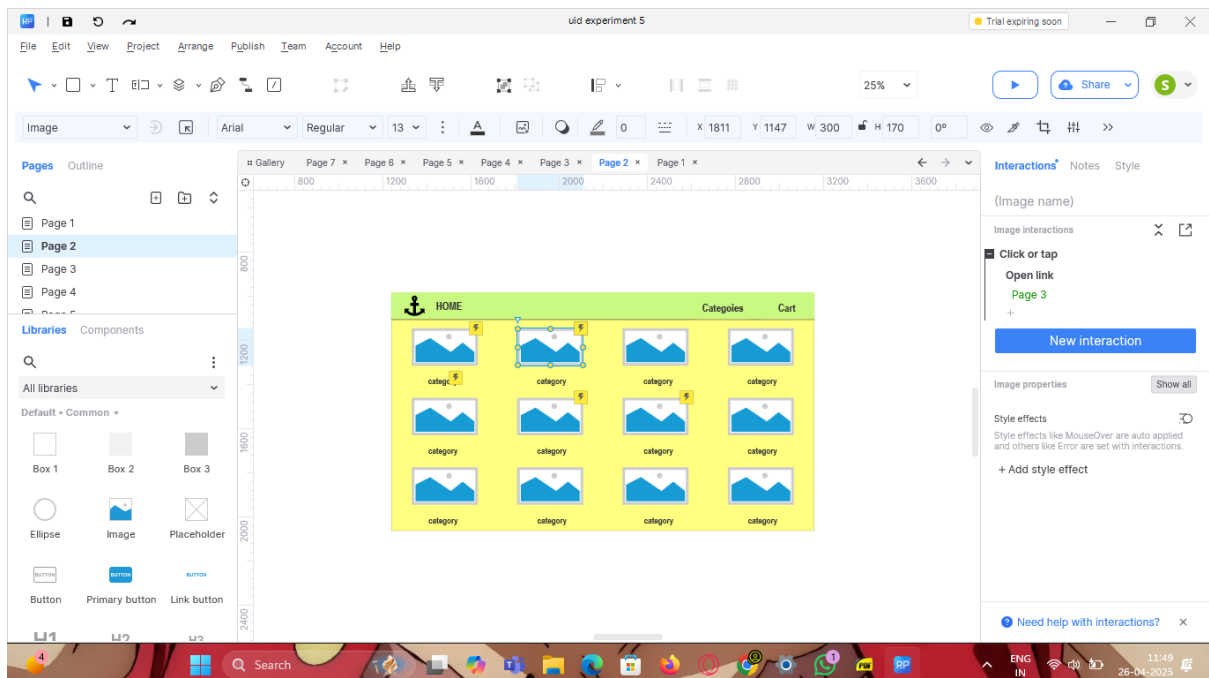

Step 2: Design the App Layout Structure

- **Screenshot Reference:** Image 1 (Page 1)
- Created a home screen layout with:
 - Header: Logo, "HOME", "Categories", "Cart"
 - Central banner/product promo area
 - Product tiles with image placeholders and labels ("product")

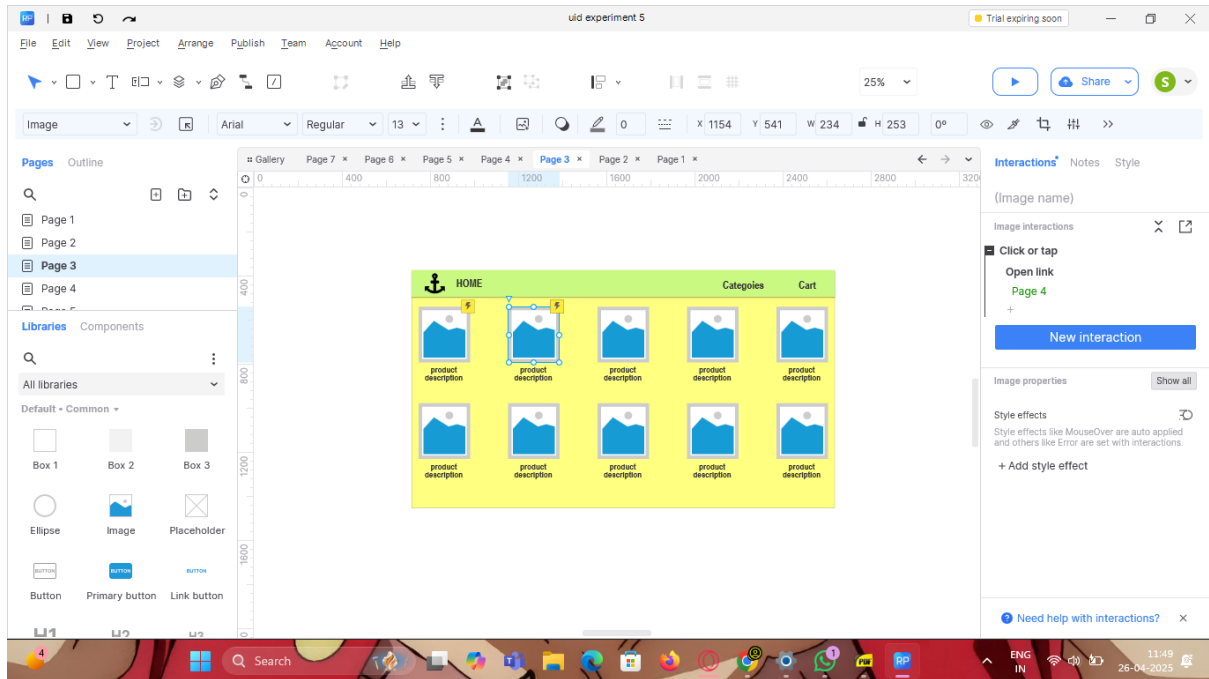

Step 3: Add Categories

- **Screenshot Reference:** Image 2 (Page 2)
- Category page with a grid of image tiles representing different product categories.
- Each image is interactive—clicking redirects to a corresponding category's products.

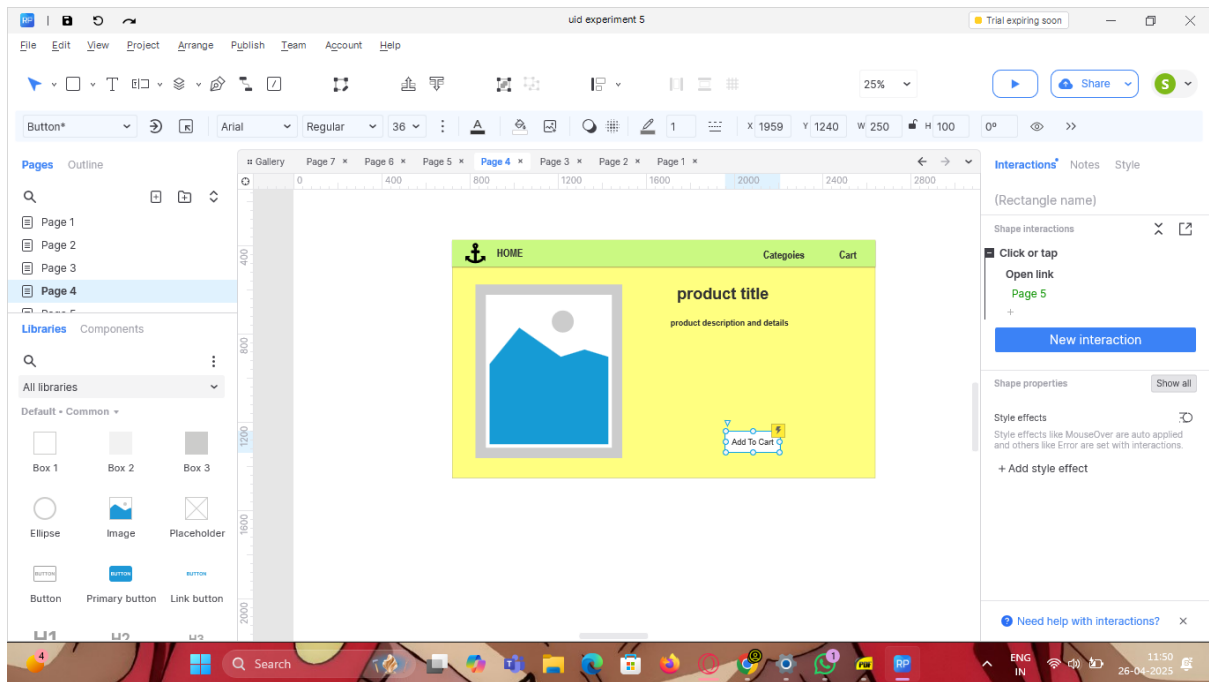

Step 4: Display Products in Selected Category

- **Screenshot Reference:** Image 3 (Page 3)
- Clicking a category navigates to a list of products with:
 - Image
 - Product Description (Label below each image)

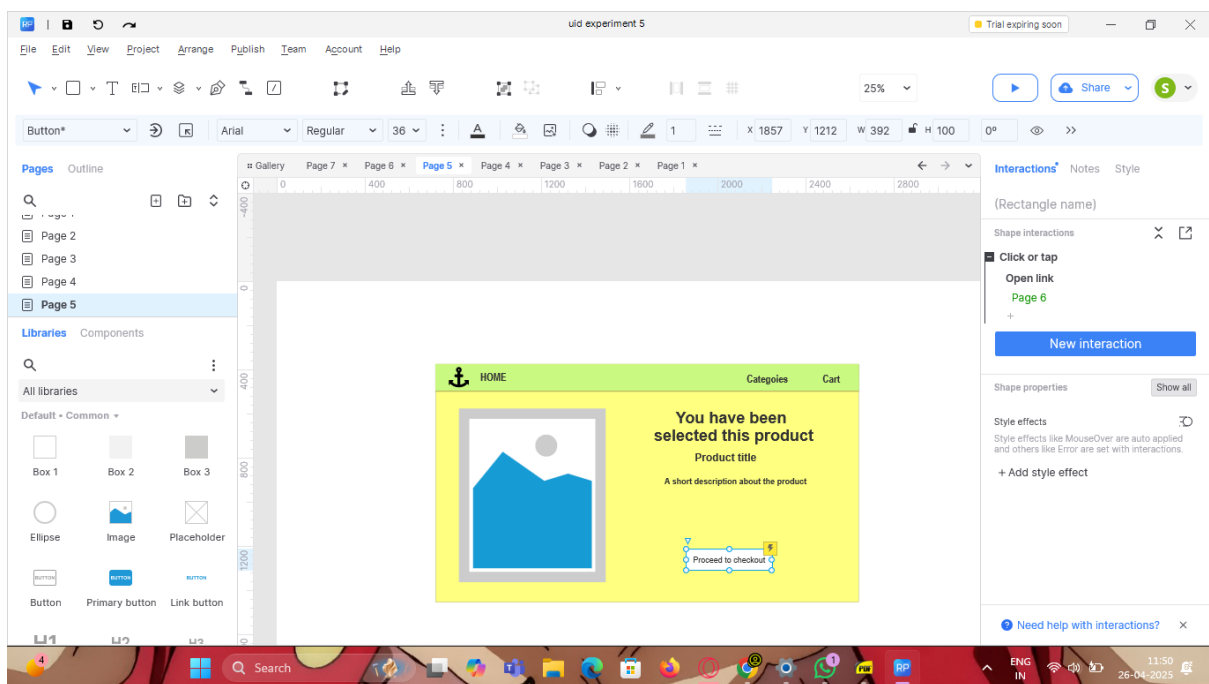

Step 5: Product Detail Page

- **Screenshot Reference:** Image 4 (Page 4)
- When a product is selected, navigates to a detailed product page:
 - Enlarged product image
 - Title and detailed description
 - "Add To Cart" button

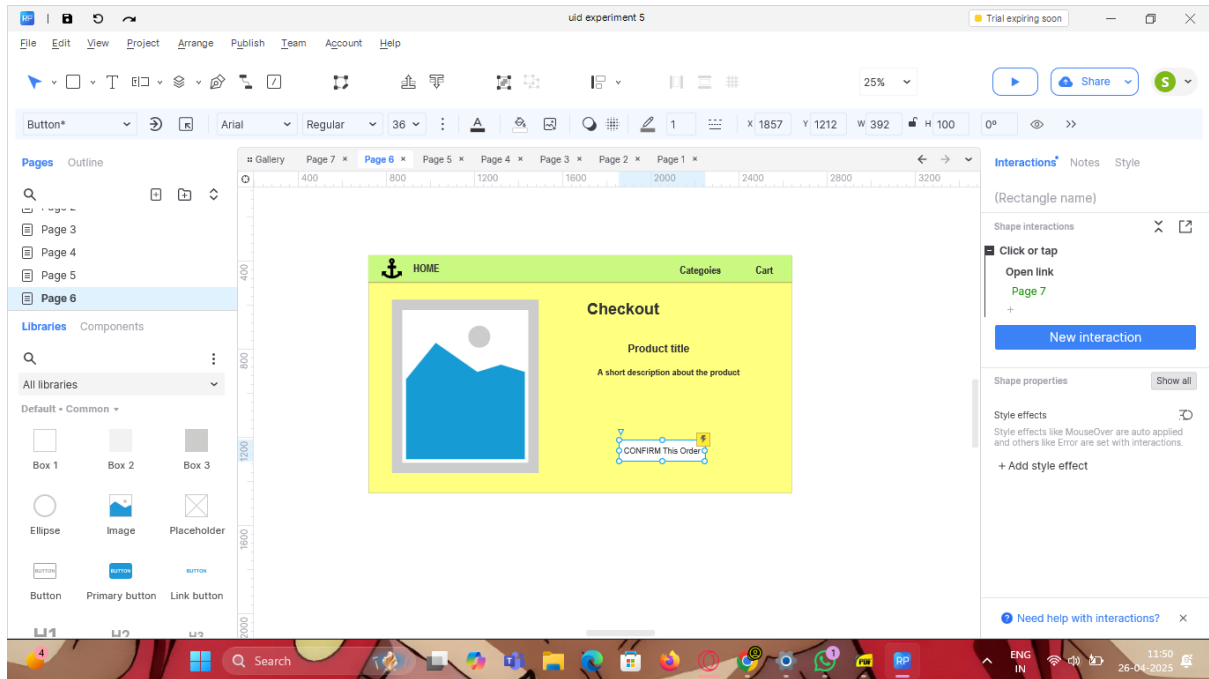

Step 6: Confirmation Page

- **Screenshot Reference: Image 5 (Page 5)**
- After clicking "Add to Cart":
 - Confirms that the product has been selected
 - Displays product title and a short note
 - Includes a "Proceed to Checkout" button

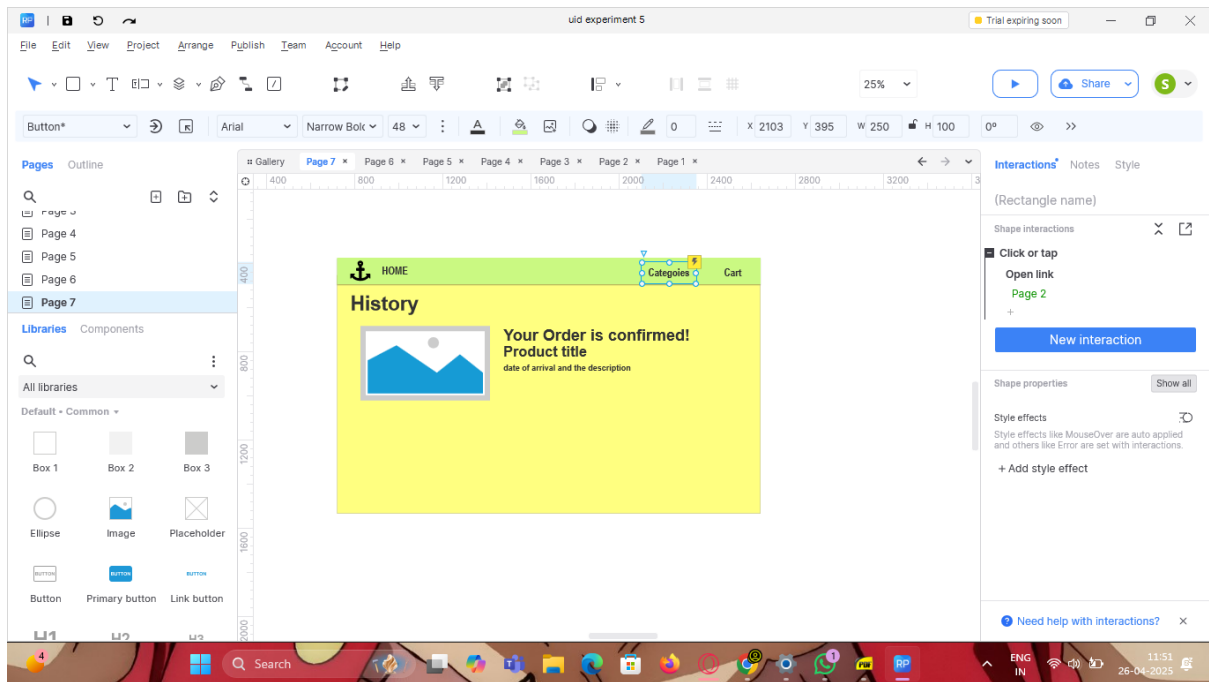

Step 7: Checkout Page

- **Screenshot Reference:** Image 6 (Page 6)
- Final checkout page includes:
 - Product image and short description
 - "CONFIRM This Order" button

Step 8: Order Confirmation Page

- **Screenshot Reference:** Image 7 (Page 7)
- Displays:
 - Order confirmed message
 - Product details
 - Estimated arrival date (placeholder)

Conclusion:

Hence, this is how we need to build a basic design using AXURE RP 11.
